

Summary Report:

Independent Evaluation: Tusla Care Leaver Career Guidance Counsellor Pilot Service

Waterford & Wexford

This Tusla Care Leaver Career Guidance Counsellor Pilot was funded through Department of Rural and Community Development Dormant Account funding. This measure provided for the procurement of a Career Guidance Service to deliver a two-year pilot project with an independent evaluation built in by design. This was a national Aftercare Services project which was piloted in the Waterford and Wexford area.

A Career Guidance officer with a dedicated link to Aftercare Services provided individual support to vulnerable young people and built links with further education and training providers.

An independent Tusla internal evaluation of the pilot project was completed. Subsequently an independent Summary Report was completed for sharing with both internal and external stakeholders which will be launched at this event.
